TO: Sedgwick County Commissioners

FROM: James and Patricia Carlson

It gives us great pleasure to write a letter of support for Wind Power in Sedgwick County. As we all know, our county doesn't offer too many opportunities for economic development. The one constant we have is wind and we need to take advantage of that.

You, as Commissioners, know the monetary affects to the county coffers and land owners. Wind Power would provide economic stability to Sedgwick County. As you also know, Deuel County, Garden County, and Perkins County are working on large wind and solar projects. It would be a travesty if they get their projects and we didn't.

Another interesting fact is that a number of the opposition to the project are either individuals who live outside our county or are newcomers to our community. Do they know what is best for us?

We feel confident that you as Commissioners will consider what is best for Sedgwick County.

Thank you for your efforts.

*James & Patricia Carlson*
