Letters of Support

Sedgwick County Planning & Zoning Department
315 Cedar Street; Suite 200
Julesburg, CO 80737

February 24, 2022

SUBJECT: Support of NRS Overland East Wind Project

To Whom It May Concern,

This letter is in response and support of the National Renewable Solutions' (NRS) wind project known as Overland East. As graduates of Julesburg High School and residents of northeast Colorado for decades, we have grown-up, graduated, farmed, and taught science here. We believe the Overland East Wind Project is good for the local community for many reasons.

With family in northeast Colorado encompassing nearly 80 years and four generations, we have watched the region grow, adapt, and strengthen itself through many challenges. Resilient and flexible with a bend-but-don't-break attitude describes those who call Sedgwick County home. Furthermore, adapting to change for the betterment of the community is paramount.

We participated in NECO years ago, lost money, and time, and hope. The Overland East Project restores that hope with a new plan and a second chance for the community. Renewable energy will come; it's not a matter of if, but when. Energy prices continue to rise both domestically and internationally; fluctuations in the global economy are felt directly here at home. Friends across the nation suffer with electric bills of \$600/month, and cost to create and maintain those sources continues to rise as every cent is squeezed from operational efficiencies. Like a solid retirement portfolio, renewable energy brings diversification and long-term stability.

From a Colorado-centric perspective, I have worked for decades with high-tech companies internationally and with the National Renewable Energy Labs in Golden. NREL is part of the Department of Energy focusing on renewables. NREL has projects ranging from wind & solar to geothermal and fuel cells. NREL was heavily involved in developing ethanol technology which helped stabilize corn markets since the 1980's. Vestas, maker of wind turbines and employer to thousands, has been in Colorado for over a decade. NJC in Sterling has a WindTech training program for local high school graduates. Overland East could employ upwards of 20 high-paying high-tech jobs. The entire food chain is here. From R&D to manufacturing and support, the natural progression and benefit is at our door. We just need to open it.

For those second, third or fourth-generation farmers, we understand the challenge; farming is hard when fuel prices are \$6 per gallon and wheat prices fluctuate from \$4 to \$12/bushel. To remain solvent and profitable, diversification is key. Farmers, cities, and communities should come together towards this common goal of prosperity, stability, and consistency.

Farming income is the mainstay of this economy. The city and county need consistency amongst the headwinds of a shrinking tax base and aging population. Payments from NRS to Sedgwick County and its residents will benefit everyone. Millions of dollars will be injected into the economy in many ways. From high-paying jobs to direct monies to the County, we support NRS' Overland East Wind Project for a stable economy for decades to come.

Sincerely,
Robert J Brown
Connie L. Brown (Blochowitz)

February 21, 2023

We, in Sedgwick County, are very fortunate to have elected officials who make decisions on sound economic principles and common sense ideas. Our Commissioners are to be commended on their sound judgements in maintaining our county.

I ask that you as Commissioners consider National Renewable Solutions request for a waiver of minimum setbacks to 1.5 times system height versus the current recommendations. This seems like a logical compromise in considering neighboring counties regulations and Industry Standards. As far as I can tell, this project has overwhelming support from the community, as well as, a tremendous economic boost to our small county's landowners and county coffers.

As you know, other than agriculture, we don't have a lot of industry. One resource that we do have is lots of wind and we need to capitalize on that. I am confident that you as commissioners will see the benefits of this project and do what's in your power to support it.

Thank you.

A handwritten signature in black ink that reads "Jim Condra". The signature is written in a cursive style with a large, looped initial "J".

Re: Overland Pass Energy East

To whom it may concern:

As taxpayer and landowner within Sedgwick, County I have seen a real opportunity that could be a huge asset to every citizen within the county. For years I've seen several wind companies come into the county, make promises, lease my land, and within a few years leave. As a former county commissioner in Phillips County, I have witness at least three companies that wanted to come into the county and do the same thing. The big reason they failed to stay was for several reasons. The lack of financial backing and no high power transmission lines to transport the electricity out of the county. I'm currently serving on the advisory committee for the (Overland Pass Energy East) and I can tell you they are the real deal. They have the financial backing and are willing to build a high powered transmission line to transport the electricity out of the county, 90 miles west to Brush. This alone costs at least a million dollars per mile. They are here to stay and would be a huge economic benefit to this county and all the citizens within, but we have to all get behind them and talk to our commissioners and other leaders and have their support also. There's one problem though.

The commissioners have placed more stringent regulations than the industry standards, which makes it more difficult for them to comply with financially and use of land. Industry standards allow 1.1 tip height, the commissioners want 2x tip height. The wind company is willing to go with 1.5x setback from county roads, power lines and non-participating parcels. The original base of the 400MW project with commissioners 2x setback vs the wind company 1.5x setback with a 2-phase 750MW project would potentially be an additional \$1.7 million for the turbine host and an additional \$1.2 million in tax payments to the county. Imagine what it could have been if the commissioners would go with the industry standard.

Our commissioners were supposed to have allowed public input and opinions before they made their final decision. Here in Phillips County we were able to do so. It is the law which they did not comply with, so let them know.

In conclusion this would greatly enhance the economy of the county, provide jobs, help community projects and etc; So please help in any way you can. THANK YOU!!

K. Joe Kinnie

Sedgwick County Planning and Zoning Board
315 Cedar St.
Julesburg, CO 80737

Dear Sedgwick County Planning and Zoning Board,

Supporting Sedgwick County has always been a priority for us. With the State Assessed Valuation going down and reducing the counties taxing coffers, there is a real need to find additional streams of revenue. It's always best to pick up tax dollars from a robust economy rather than land taxes, but the business base in Sedgwick County cannot currently make up the difference from the state lowering of the valuation. However, supporting the Overland Pass Energy project being developed by National Renewable Solutions, and supporting the waiver for 1.5x system height vs. 2x system height will add revenue to the county and to landowners.

As a ranch family, the multi year drought, water insecurities, lack of feed and these weekly snow storms have many of our neighbors selling their cows. The need to supplement farming and ranching has never been greater. Here's a company ready to do business in our county along with private landowners to supplement farm income. We may not be able to grow enough feed in the county but we do have plenty of wind. Let's farm the wind. We have plenty of it!

The 20-25 projected long term jobs would make National Renewable Solutions one of the top 10 employers in the county. Having this many employees living and doing business in our area will positively impact downtown stores, recreational facilities, medical facilities, our two school systems, not to mention auto dealerships, shade tree mechanics, real estate agents, landscaping the list can go on and on.

Please consider the waiver request in front of you. We need National Renewable Solutions to be successful and in turn the county and landowners will be well enriched.

Sincerely,
Randy and Anna Scott

TO: Sedgwick County Planning and Zoning Committee

I am land owner and longtime resident of Sedgwick County and I am serving on the advisory board for the Overland Pass Energy East project. I would like to address some of my concerns with the setback regulations from roads, powerlines, and non-participating parcels, that are currently in place for Sedgwick County.

My concern is that the current setback regulations are far from where the industry standard is set, which is 1.1x system height (and which is what other nearby counties have allowed). Sedgwick County regulations at one time followed that standard but has currently moved to a 2x system height. This is almost doubling the setback height which is concerning. It's my understanding that the currently proposed project, with the current regulations in place would only be 400 MW and being a \$1.4 million tax payment to the county. If the regulations in the county were moved to the proposed 1.5x system height the project could then be expanded to a 750 MW project. This means an additional \$1.2 million in tax payments for the county. Not to mention the additional \$1.7 million in landowner payments. Our county has let too many things pass by its doors in the past. When an opportunity like this comes about, we need to be willing to accommodate where we can. I feel it would be beneficial for all to meet in the middle for a 1.5x system height regulation.

Thank you all for you consideration in this matter and I hope you will make a planned and informed decision.

Sincerely,

Kelly Kinnie

“Enhancing Sedgwick County”

February 22, 2023

Sedgwick County Planning & Zoning Committee
Sedgwick County Commissioners
315 Cedar Street
Julesburg, CO 80737

Dear Sedgwick County Commissioners,

As we begin this new year we can look forward to the realization of several projects and improvements that have taken years to develop and are finally being realized within our county. The new Julesburg School facility will be completed by summer, the proposed Cobblestone Hotel will begin construction this fall, the new pool complex funding has been secured and is being rebid for construction, and our downtown pavilion project will begin this spring. We anticipate this will only be the beginning of other developments within our community. Additionally, the new CEO has already brought a renewed enthusiasm to our medical facility and has been busy retaining current staff, filling vacancies, and working to implement programs and services that our residents need and want to have available locally. The hiring of an additional Economic Development Director by the County also shows your commitment to growth and prosperity. The County and our Foundation definitely have a lot to be proud of for the part we have played in bringing these improvements to our citizens.

Another proposed project for our area includes the Overland Pass Energy Project which will use our free and plentiful wind to provide a renewable source of energy through the placement of wind towers amid acres of farm ground throughout our southern table. This project will subsidize our farmers who have struggled for years to make a profit due to the rising costs of production and weather-related issues and has the potential to add to our County’s economy in a way that we have not had since the closing of the Sugar Factory so many years ago. This project will employ 20-25 people (and their families) who will be needed during the construction, then for maintenance and support of the wind farms. These families will live, work, and shop here in addition to an estimated increase of \$1.4 million in annual tax revenue throughout the life of the project (30-50 years).

While our Foundation is open to applications to help support many of these projects, we are limited as to how we can encourage and enhance those projects that will benefit our citizens. We hope that you will also be willing to support and work with the entities that are eager to be a part of our growth through a cooperative effort in implementing the regulations that are a necessary part of the process. The required height setbacks which determine tower placement have a direct impact on the size of the project, the amount of landowner participation that can be offered, and the ability to maximize the capability of this project to optimize our county’s return and the power available for sale to willing buyers.

— THE
William Stretesky
— FOUNDATION

“Enhancing Sedgwick County”

The Stretesky Foundation was the first landowner in Sedgwick County to sign up acreage for this energy project. We hope to encourage other landowners to consider this opportunity to support their own operations as well a way to provide a clean, available source of energy that we all need. This project will require a cooperative effort in order for us to add this to the list of our County’s accomplishments and provide an additional source of support for our County. We thank you in advance for your insight and careful consideration to the needs of this project.

Respectfully,

Kimberly Orth,
Executive Director

THENCE, along a farming line, S 00°31'20" E 2691.85 feet to a point in the center of a trail road, from which a six-inch wooden post bears North Thirty five (35) feet more or less;

THENCE, along the center of said trail road, N 89°47'50" E 1310.42 feet to a point which is midway between a farming line to the West and a trail road to the East;

THENCE, N 00°16'30" W 2683.44 feet to the true POINT OF BEGINNING, containing 81.22 acres;

A tract of land located in the East Half of the Southeast Quarter (E/2 SE/4) of Section One (§1), Township Nine North (T9N), Range Forty-four West of the 6th P.M. (R44W), in Sedgwick County, Colorado more particularly described as follows:

BEGINNING at the Northeast corner of §1;

THENCE, along the center of a trail road, S 00°01'40" E 2643.73 feet to its intersection with the farming line running West, the true POINT OF BEGINNING;

THENCE, along said farming line, N 89°50'30" W 1322.20 feet to a point, from which a post at the apparent center of §1 bears along that same farming line N 89°52'30" W 1322.20 feet;

THENCE, from said point S 00°16'30" E 2683.44 feet to the center of a trail road at a point which is midway between a farming line to the West and a trail road to the East;

THENCE, from said midway point, along a trail road, N 89°47'50" E 1310.42 feet to its intersection with first said trail road;

THENCE, along the trail road N 00°01'40" W 2675.08 feet to the true POINT OF BEGINNING, containing 80.97 acres and less and except the following described parcel:

A Parcel of land in the Southeast Quarter (SE/4) of Section One (§1), Township Nine North (T9N), Range Forty-Four West of the Sixth Principal Meridian (R44W), Sedgwick County, Colorado, said parcel being more particularly described as follows:

COMMENCING at the Southeast corner of said §1;

THENCE North 00°00'00" East along the East line of said §1 a distance of 1473.7 feet to the Point of Beginning;

THENCE South 90°00'00" West a distance of 601.5 feet;

THENCE North 00°00'00" East a distance of 1183.88 feet to a point on the North line of said SE/4 of §1;

THENCE North 89°53'25" East along the North line of Said SE/4 of §1 a distance of 601.5 feet to the Northeast corner of said SE/4 of §1;

THENCE South 00°00'00" West along the East line of said SE/4 of §1 a distance of 1184.8 feet to the POINT OF BEGINNING and containing 16.35 acres, more or less, subject to a county road right-of-way along the East line of said §1.

Tract 6:

The Southwest Quarter (SW1/4) of Section Five (5), Township Nine (9) North, Range Forty-three (43) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 7:

The Southwest Quarter (SW1/4) of Section Six (6), Township Nine (9) North, Range Forty-three (43) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 8:

The Northeast Quarter (NE1/4) of Section Seven (7), Township Nine (9) North, Range Forty-three (43) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 9:

PARCEL 4:

A parcel of land located in the N½ of Section 8, Township 9 North, Range 43 West of the 6th P.M., Sedgwick County, Colorado, more particularly described as follows:
Beginning at the Northwest corner of said Section 8;
thence N 87°14'22" E, along the North line of said Section, a distance of 2125.00 feet to the West line of that property surveyed by Lou Harmon of Harmon Engineering on March 15, 1989,;
thence S 02°45'38" E, along said West line, a distance of 1320.00 feet to the South line of said property;
thence N 87°14'22" E, along said South line, a distance of 613.95 feet;
thence S 02°51'29" E, a distance of 342.85 feet;
thence S 17°45'34" W, a distance of 178.52 feet;
thence S 02°51'19" E, a distance of 822.78 feet to the East - West quarter Section line, a distance of 2611.93 feet to the West line of the said Northwest quarter;
thence N 01°54'36" W, along said West line, a distance of 2649.67 feet to the point of beginning.

Tract 10:

The Southwest Quarter (SW1/4) of Section Twenty-two (22), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 11:

A parcel of land located in the NE¼ of Section 8, Township 9 North, Range 44 West of the 6th P.M., Sedgwick County, Colorado, being more particularly described as follows: Commencing at the Northeast corner of Section 8, Township 9 North, Range 44 West of the Sixth Principal Meridian, Sedgwick County, Colorado; Thence South 00°10'47" West on the East line of the Northeast 1/4 of said Section 8, a distance of 1410.96 feet to the point of beginning; Thence continuing on said East line South 00°10'47" West, 1266.41 feet to the East 1/4 corner of said Section 8; Thence North 89°31'33" West on the South line of said Northeast 1/4, 2690.23 feet to the center corner of said Section 8; Thence North 00°02'02" East on the West line of said Northeast 1/4, 1251.44 feet; Thence South 89°50'41" East on the South line of Parcel "A", 2693.36 feet to the point of beginning.

Tract 12:

The South Half (S1/2) of Section Seven (7), Township Ten (10) North, Range Forty-four (44) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 13:

The Southwest Quarter (SW1/4) of Section Eighteen (18), Township Ten (10) North, Range Forty-four (44) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 14:

The Northwest Quarter (NW1/4) of Section Nineteen (19), Township Ten (10) North, Range Forty-four (44) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 15:

The South Half (S/2) of Section Nineteen (§19), Township Ten North (T10N), Range Forty-four West of the 6th P.M. (R44W), Sedgwick County, Colorado, described as follows:

BEGINNING at the Southwest corner of §19;

THENCE, along the West line thereof, N 00°00'00" E 2664.53 feet to the Northwest corner of the South Half of §19;

THENCE, along the North line of said South Half, N 89°39'31" E 5343.82 feet to the Northeast corner of said South Half;

THENCE, along the East line thereof, S 00°21'58" W 2672.26 feet to the Southeast corner of said §19;

THENCE, along the south line thereof, S 89°44'24" W 5326.70 feet to the POINT OF BEGINNING, containing 326.81 acres of land, less and except the following described parcels:

A tract in the South Half (S/2) of Section Nineteen (§19), Township Ten North (T10N), Range Forty-four West of the 6th P.M. (R44W), Sedgwick County, Colorado, described as follows:

BEGINNING at the Southeast corner of §19;

THENCE, along the South line thereof, S 89°44'24" W 470.00 feet;

THENCE N 00°21'58" E 465.00 feet

THENCE N 89°44'24" E 470.00 feet;

THENCE, along the East line of said Half, S 00°21'58" W 465.00 feet to the POINT OF BEGINNING, containing 5.02 acres; and

A tract in the South Half (S/2) of Section Nineteen (§19), Township Ten North (T10N), Range Forty-four West of the 6th P.M. (R44W), Sedgwick County, Colorado, described as follows:

BEGINNING at a point on the South line of §19 at a distance

S 89°44'24" W 1175.00 feet from the Southeast corner thereof;

THENCE, along said South line, S 89°44'24" W 1650.00 feet;

THENCE N 00°15'36" W 730.00 feet

THENCE N 89°44'24" E 1650.00 feet;

THENCE S 00°15'36" E 730.00 feet to the POINT OF BEGINNING, containing 27.65 acres.

Tract 16:

The East Half (E/2) of Section One (§1), Township Nine North (T9N), Range Forty-five West of the 6th PM (R45W), Sedgwick County, Colorado, more particularly described as follows:

BEGINNING at the Northeast corner of §1;
THENCE, along the North line thereof, N 90°00'00" W 2642.50 feet to the Northwest corner of the East Half of §1;
THENCE, along the West line of said Half, S 00°01'20" E 5283.95 feet to the Southwest corner thereof;
THENCE, along the South line thereof, S 89°36'40" E 2636.74 feet to the Southeast corner thereof;
THENCE, along the East line thereof, N 00°02'30" E 5301.85 feet to the POINT OF BEGINNING, containing 320.73 acres of land, and less and except the following described parcel:

A parcel of land in the Southeast Quarter (SE/4) of Section One (§1), Township Nine North (T9N), Range Forty-five West of the 6th PM (R45W), Sedgwick County, Colorado, more particularly described as follows:

COMMENCING at the Southeast corner of said §1;
THENCE, North 89°42'55" West along said South line of said SE/4 of §1 a distance of 1273.0 feet to the true Point of Beginning;
THENCE, continuing North 89°42'55" West along said South line of said SE/4 of §1 a distance of 104.0 feet;
THENCE, North 00°17'05" East a distance of 30.0 feet;
THENCE, North 34°19'00" West a distance of 826.8 feet;
THENCE, North 54°44'45" West a distance of 49.3 feet;
THENCE, North 89°08'10" West a distance of 594.3 feet;
THENCE, North 39°11'00" West a distance of 62.5 feet;
THENCE, North 00°52'05" West a distance of 381.0 feet;
THENCE, South 89°43'45" West a distance of 123.8 feet to a point on the West line of said SE/4 of §1;
THENCE, North 00°04'25" East along the West line of said SE/4 of §1 a distance of 581.7 feet;
THENCE, North 89°09'25" East a distance of 771.4 feet;
THENCE, South 53°15'15" East a distance of 142.4 feet;
THENCE, South 04°12'45" West a distance of 507.0 feet;
THENCE, South 03°10'00" East a distance of 314.0 feet;
THENCE, South 13°55'40" West a distance of 130.4 feet;
THENCE, South 34°32'25" East a distance of 821.8 feet;
THENCE, South 64°14'05" East a distance of 80.9 feet;

THENCE, South 00°17'05" West a distance of 30.0 feet to the POINT OF BEGINNING, containing 19.82 acres, more or less, subject to a county road right-of-way along the South line of said §1.

Tract 17:

The Southwest Quarter (SW1/4) of Section Two (2), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 18:

The SE¼ of Section 13, Township 10 North, Range 45 West of the 6th P.M., Sedgwick County, Colorado
EXCEPT A parcel of land located in the NE¼SE¼ of Section 13, Township 10

North, Range 45 West of the 6th P.M., more particularly described as follows:
Beginning at the Northeast corner of the Northeast Quarter of the Southeast Quarter of said Section 13;
thence S 01°36'33" E, along the East line of said Northeast Quarter of the Southeast Quarter of said Section 13, a distance of 660.00 feet;
thence S 88°23'27" W, a distance of 660.00 feet;
thence N 01°33'25" W, a distance of 660.00 feet to the North line of said Northeast Quarter of the Southeast Quarter of said Section 13;
thence N 88°26'35" E, along said North line, a distance of 660.00 feet to the point of beginning.
Sedgwick County, Colorado.

Tract 19:

The East Half (E1/2) of Section Seventeen (17), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 20:

The Northwest Quarter (NW/4) of Section Seventeen (§17), Township Ten North (T10N), Range Forty-five West of the 6th P.M. (R45W), Sedgwick County, Colorado, described as follows:

BEGINNING at the Northwest corner of said Section;

THENCE, along the West line thereof, S 00°15'53" E 2679.73 feet to the Southwest corner of said Quarter;

THENCE, along the South line thereof, S 89°18'13" E 2650.32 feet to the Southeast corner of said Quarter;

THENCE, along the East line of said Quarter, N 00°07'57" W 2676.12 feet to the Northeast corner of said Quarter;

THENCE, along the North line thereof, N 89°13'40" W 2656.57 feet to the POINT OF BEGINNING, containing 163.10 acres of land; and

Tract 21:

The Southwest Quarter (SW/4) of Section Seventeen (§17), Township Ten North (T10N), Range Forty-five West of the 6th P.M. (R45W), Sedgwick County, Colorado, described as follows:

BEGINNING at the Southwest corner of said Section;

THENCE, along the South line thereof, S 89°22'47" E 2644.09 feet to the Southeast corner of said Quarter;

THENCE, along the East line thereof, N 00°07'57" W 2676.12 feet to the Northeast corner thereof;
THENCE, along the North line of said Quarter, N 89°18'13" W 2650.32 feet to the Northwest corner of said Quarter;
THENCE, along the West line thereof, S 00°15'53" E 2679.73 feet to the POINT OF BEGINNING, containing 162.73 acres of land, less and except the following describe parcel:

A parcel of land in the Southwest Quarter (SW/4) of Section Seventeen (§17), Township Ten North (T10N), Range Forty-five West of the 6th P.M. (R45W), Sedgwick County, Colorado, said parcel being more particularly described as follows:

BEGINNING at the Southwest corner of §17;
THENCE N 00°15'53" W along the West line of said §17 a distance of 1082.0 feet;
THENCE S 88°00'50" E a distance of 766.0 feet;
THENCE N 04°07'40" E a distance of 183.1 feet
THENCE N 31°44'35" E a distance 85.6 feet
THENCE S 89°47'10" E a distance 487.3 feet
THENCE S 60°29'50" E a distance 75.9 feet
THENCE S 01°58'30" W a distance 739.0 feet
THENCE S 34°37'55" W a distance 57.0 feet
THENCE S 89°30'20" W a distance 424.4 feet
THENCE S 01°28'35" E a distance 492.5 feet to a point on the South line of said SW/4 of §17
THENCE N 89°22'40" W along the South line of said SW/4 of §17 a distance 903.0 feet to the POINT OF BEGINNING and containing 31.55 acres, more or less, subject to a county road right-of-way along the West line of said §17.

Tract 22:

The West Half (W1/2) of Section Twenty-five (25), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 23:

S½ of Section 26, Township 10 North, Range 45 West of the 6th P.M., Sedgwick County, Colorado

EXCEPT a tract of land in the NE¼SE¼ of Section 26, Township 10 North, Range 45 West of the 6th P.M., more particularly described as follows: Beginning at the Northeast corner of the Southeast Quarter of Section 26; thence, along the North line thereof, S 88°13' W 431.8 feet to a fence corner; thence, along a fence, S 0°11' E 834.6 feet; thence S 89°20' E 429 feet to the East line of Section 26; thence, along said East line, N 0°00' E 853 feet to the point of beginning.

Tract 24:

The Southeast Quarter (SE/4) of Section Thirty-five (§35), Township Ten North (T10N), Range Forty-five West of the 6th PM (R45W), Sedgwick County, Colorado, more particularly described as follows:

BEGINNING at the Southeast corner of §35;

THENCE, along the South line thereof, N 89°59'00" W 2652.63 feet to the Southwest corner of the SE/4;

THENCE, along the West line thereof, N 0°44'00" E 2670.80 feet to the Northwest corner thereof;

THENCE, along the North line thereof, S 89°58'40" E 2644.40 feet to the Northeast corner thereof;

THENCE, along the East line thereof, S 0°33'30" W 2670.50 feet to the point of beginning, containing 162.37 acres of land, less and except the following described parcel:

A parcel of land in the Southeast Quarter (SE/4) of Section Thirty-five (§35), Township Ten North (T10N), Range Forty-five West of the 6th Principal Meridian (R45W), Sedgwick County, Colorado, being more particularly described as follows:

COMMENCING at the Southeast corner of said §35;

THENCE, South 90°00'00 West along the South line of said §35 a distance of 2644.6 feet to the true Point of Beginning;

THENCE, continuing South 90°00'00 West along the South line of said §35 a distance of 60.0 feet to the Southwest corner of said SE/4 of §35;

THENCE, North 01°16'50" East along the West line of said SE/4 of §35 a distance of 1840.9 feet;

THENCE, North 89°47'05" East a distance of 1175.1 feet;

THENCE, South 01°48'20" West a distance of 880.8 feet;

THENCE, South 88°08'45" West a distance of 1108.3 feet;

THENCE, South 01°16'50" West a distance of 928.9 feet to the POINT OF BEGINNING, containing 25.39 acres more or less, subject to a county road right-of-way along the South line of said §35.

Tract 25:

The Northwest Quarter (NW1/4) of Section Twelve (12), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 26:

The Southeast Quarter (SE1/4) of Section Three (3), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 27:

The Northeast Quarter (NE1/4) of Section Fourteen (14), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 28:

The Northwest Quarter (NW1/4) of Section Thirteen (13), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 29:

The Northwest Quarter (NW1/4) of Section Fourteen (14), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado, AND

Tract 30:

All of Section Fifteen (15), Township Ten (10) North, Range Forty-six (46) West of the 6th P.M., Sedgwick County, Colorado.

Tract 31:

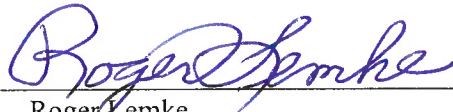

The South Half (S1/2) of Section Six (6), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 32:

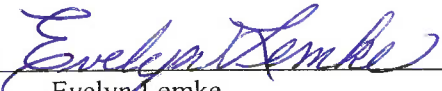

The Northeast Quarter (NE1/4) of Section Thirty (30), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

The undersigned, registered property owners of the above noted property, and Overland Pass Energy LLC, a Colorado limited liability company, have agreed to authorize National Renewable Solutions LLC, and other project representatives to take all actions necessary for the application, processing, issuance and acceptance of any land use permit, conditional use permit, or other county or state permits for development, construction and operations, or certifications requested by such agents and representatives.

I/We hereby certify the above information submitted in this statement is true and accurate to the best of our knowledge.

Tract 2:

The E1/2 of Section 22, Township 11 North, Range 44 West of the 6th P.M.,

EXCEPT, a parcel of land in the NE¼ of Section 22, Township 11 North, Range 44 West of the 6th P.M., said parcel being more particularly described as follows: Beginning at the Northeast corner of said Section 22; thence South 3°01'45" East along the East line of said Section 22 a distance of 1378.9 feet; thence South 86°03'25" West along an existing fence line and the Easterly extension thereof a distance of 1009.4 feet; thence North 49°27'15" West a distance of 36.6 feet; thence North 8°35'45" West along an existing fence line a distance of 68.1 feet; thence South 83°02'20" West along an existing fence line a distance of 1675.1 feet to a point on the West line of said NE¼ of Section 22; thence North 2°55'35" West along the West line of said NE¼ of Section 22 a distance of 1485.4 feet to the Northwest corner of said NE¼ of Section 22; thence North 88°25'10" East along the North line of said NE¼ of Section 22 a distance of 2711.8 feet to the point of beginning.

AND ALSO EXCEPT:

A tract of land located in the SE 1/4 of Section 22, T.11 N., R.44 W. of the 6th P.M., Sedgwick County, Colorado, being more particularly described as follows:

Beginning at the SE Corner of Section 22, T.11 N., R.44 W. of the 6th P.M., Sedgwick County, Colorado; thence S 88°04'50" W on the south line of the SE 1/4 of said Section, 1139.34 feet; thence N 01°55'10" W perpendicular with said South line, 42.99 feet; thence N 66°04'55" E 221.74 feet to the beginning of a non-tangent 1,300.00 foot radius curve concave northwesterly thence northeasterly on the arc of said curve 1292.95 feet (chord bearing N 37°34'08" E with a chord length of 1240.32 feet); thence N 88°04'50" E parallel to said South line, 124.04 feet to a point on the east line of said SE 1/4; thence S 03°01'39" E on said east line, 1083.47 feet the Point of Beginning containing 11.67 +/- acres, more or less, subject to Highway #385 Right-of-Way along the east line of said Section

Tract 3:

A parcel of land in the W 1/2 of Section 22, Township 11 North, Range 44 West of the 6th P.M., Sedgwick County, Colorado, more particularly described as follows: Beginning at the SW corner of said Section 22; thence N 02°49'50" W along the West line of said Section 22, 3335.1'; thence N 56°21'00" E, 225.8'; thence N 87°41'20" E, 1337.4'; thence N 07°24'20" W, 327.1'; thence N 19°31'40" W, 808.7'; thence N 10°35'40" E, 788.5'; thence N 88°24'40" E, 406.5'; thence S 37°13'00" E, 613.3'; thence S 81°32'30" E, 227.2'; thence S 32°01'40" E, 577.6'; thence S 02°56'00" E, 4285.9'; thence S 88°04'50" W along the south line of said Section 22, 2721.4' to the point of beginning, being a total area of 262.0 acres.

Tract 4:

A parcel of property in the Southeast Quarter (SE1/4) of Section Twenty-seven (27), Township Eleven (11) North, Range Forty-four (44) West of the 6th P.M. in Sedgwick County, Colorado, more particularly described as :

beginning at a point on the South line of Section 27 at a distance West 40 feet from the Southeast corner thereof; thence, along the West line of the County Road right-of-way, N 0°00'E 1680 feet; thence N 90°00' W 680 feet; thence N 0°00' E 275 feet; thence N 90°00' W 295 feet; thence N 0°00' E 267.6 feet; thence N 65°33' W 359.56 feet; thence N 5°50' E 278.86 feet to the North line of the Southeast Quarter of Section 27; thence, along said North line, S 89°58'30" W 1390.30 feet to the Northwest corner of said Quarter; thence, along the West line thereof, S 0°25'10" E 2649.54 feet to the Southwest corner of said Quarter; thence, along the South line thereof, N 89°58'30" E 2644.82 feet to the point of beginning, containing 139.07 acres.

Tract 5:

All of Section Thirty-four (34), Township Eleven (11) North, Range Forty-four (44) West of the 6th P.M., Sedgwick County, Colorado.

Tract 6:

The Northeast Quarter (NE1/4) for Section Seven (7), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 7:

The Southwest Quarter (SW1/4) of Section Thirteen (13), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 8:

All of Section Twenty-one (21), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 9:

All of Section Twenty-two (22), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 10:

The North Half (N1/2) of Section Twenty-three (23), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 11:

The Southeast Quarter (SE1/4) of Section Twenty-four (24), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 12:

The Southeast Quarter (SE1/4) of Section Twenty-eight (28), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado.

Tract 13:

The Northeast Quarter (NE1/4) of Section Eight (8), Township Ten (10) North, Range Forty-five (45) West of the 6th P.M., Sedgwick County, Colorado, EXCEPT a tract of land of 35 acres conveyed by Warranty Deed recorded in Book 181, Page 37, Reception No. 173855.

Tract 14:

A parcel of real estate being 419 feet wide (running East and West) and 300 feet long (running North and South) and described as the Eastern 419 feet of the Northern 300 feet in the extreme Northeast corner of the NE1/4 of the NE1/4 of Section 25, Township 10 North, Range 45 West of the 6th P.M.

AND

A tract of land located in the NE¼ Section 25, Township 10 North, Range 45 West of the 6th P.M., Sedgwick County, Colorado, being more particularly described as follows:

Commencing at the NE corner of Section 25, Township 19 North, Range 45 West of the 6th P.M., Sedgwick County, Colorado; thence N 89°48'19" W on the north line of the NE¼ of said Section, also being the north line of a tract described in Deed Instrument #192852, 419.00 feet to the Point of Beginning; thence S 00°28'44" W on the west line of said tract, 300.00 feet to the SW corner of said tract; thence S 89°48'19" E on the south line of said tract, 419.00 feet to the SE corner of said tract, also being a point on the east line of said NE¼; thence S 00°28'45" W on said east line, 320.00 feet; thence S 80°03'19" W 438.23 feet; thence N 00°28'44" E 697.15 feet to a point on said north line; thence S 89°48'19" E on said north line, 12.00 feet to the Point of Beginning, containing 3.63 acres, more or less

The undersigned, registered property owners of the above noted property, and Overland Pass Energy LLC, a Colorado limited liability company, have agreed to authorize National Renewable Solutions LLC, and other project representatives to take all actions necessary for the application, processing, issuance and acceptance of any land use permit, conditional use permit, or other county or state permits for development, construction and operations, or certifications requested by such agents and representatives.

I/We hereby certify the above information submitted in this statement is true and accurate to the best of our knowledge.

AGENT AUTHORIZATION FORM

PROPERTY LEGAL DESCRIPTION:

Tract 1:

East Half of the Southwest Quarter (E1/2SW1/4) and the West Half of the Southeast Quarter (W1/2SE1/4) of Section Fourteen (14), Township Eleven (11) North, Range Forty-four (44), West of the 6th P.M.

EXCEPT:

A parcel of land in the Southwest Quarter of Section 14, Township 11 North, Range 44 West of the 6th P.M., described as:

Beginning at a point on the South line of Section 14 at a distance of 1342.51 feet East from the Southwest corner thereof; thence, along the South line thereof, N 90°00' E 285.10 feet; thence, N 0°00' E 559.46 feet; thence, N 90°00' W 272.92 feet; thence, along a fence S 1°15' W 559.59 feet to the point of beginning, containing 3.58 acres.

AND

The W1/2SW1/4 and the S1/2NW1/4 of Section 14, Township 11 North, Range 44 West of the 6th P.M.

EXCEPT:

That parcel of land situate in the southwest corner of Section 14, Township 11 North, Range 44 West described by metes and bounds as follows: Beginning at the point of the intersection of the east line of Highway No. 51, and the north line of the County Highway between Sections 14 and 23 in Township 11 North, Range 44 West; running thence north along the east line of said Highway No. 51, a distance of 360 feet; thence east and parallel to the north line of said County Highway between said Sections 14 and 23, a distance of 525 feet; thence south and parallel to said east line of said Highway No. 51, a distance of 360 feet to the north line of said County Highway between said Sections 14 and 23; thence along said north line of said County Highway a distance of 525 feet to the point of beginning, containing 4.297 acres, more or less.

ALSO EXCEPT:

A parcel of land in the SW¼ of Section 14, T. 11N., R. 44 W. of the 6th P.M. Sedgwick County, Colorado, being more particularly described as: Beginning at the SW corner of said Section 14, T. 11N., R. 44 W. of the 6th P.M.; Thence N. 01°26'20" W. along the west line of said Section 14 723.0'; Thence N. 87°28'30" E. 338.6' to a 8" wooden post; Thence S. 44°23'50" E. 467.8'; Thence S. 00°00'00" W. 375.0' to the point of intersection with the south line of said Section 14; Thence S. 87°28'30" W. along the south line of said Section 14, 648.0' back to the point of beginning

ALSO EXCEPT:

A tract of land situated in the Northwest Quarter of Section 14, Township 11 North, Range 44 West of the 6th P.M., more particularly described as follows: Beginning at the Northwest Corner of said Section 14, at which point was found a metal rod under the asphalt of State Highway No.

385 and a PK nail was set in the asphalt and using a bearing of S00°20'13" E on the West section line of said Section 14 as a basis of bearings for the remainder of this survey; Thence S 00°20'13" E a distance of 1324.19' along the West line of said Section 14 and the centerline of the right-of-way of said Highway 385 to the TRUE POINT OF BEGINNING, at which point a PK nail was set in the asphalt from which a truck axle set on the East right-of-way line bears N 88°51'56" E 34 feet distant; Thence, continuing S 00°20'13" E a distance of 1142.00' along said section line and centerline and the West line of the herein described parcel to a point where a PK nail was set in the asphalt as the Southwest corner of the herein described parcel from which a truck axle set on the East right-of-way line bears N 89°06' 59" E 34 feet distant; Thence N 89°06'59" E a distance of 1142.00' to the Southeast corner of the herein described parcel where a truck axle was set for a monument; Thence N 00°20'13" W a distance of 1147.00' to the Northeast corner of the herein described parcel where a truck axle was set for a monument in a fence running East and West; Thence S 88°51'56" W a distance of 1142.06' along said fence to the TRUE POINT OF BEGINNING.

Said parcel contains 30.00 Acres, more or less, including a strip of land parallel with and adjacent to and on the East side of the West line of said parcel that is reserved for the right-of-way of State Highway 385. Said strip of land contains 0.89 Acres, more or less.

Section 7.2 Assignment of Our Interest in the Lease

Subject to any over provisions herein, We have the right to do any of the following with respect this Lease or to all or any portion of the Property without obtaining Your consent: (i) grant co-leases, separate leases, subleases, easements, licenses or similar rights to one or more third parties; (ii) sell, convey, lease, assign, mortgage, encumber or transfer this Lease to one or more third parties or to any of Our affiliates, or any right or interest in this Lease, or any or all Our right or interest in the Property or in any or all of the Wind Facilities. Any such assignment, transfer or conveyance shall not be for a period beyond the Term of this Lease. The assignee or transferee shall be subject to all of the obligations, covenants and conditions applicable to Us. We shall not be relieved from liability for any of Our obligations under this Lease by virtue of the assignment or conveyance unless We assign or convey all of Our interest under the Lease to one or more assignees or transferees who assume all of Our obligations under the Lease. You agree that You will, without additional compensation, execute such separate leases, subleases, easements, licenses or similar rights as We may request hereunder.

Executive Summary

Westwood Professional Services (Westwood) is pleased to present this Desktop Geohazard Report to National Renewable Solutions for the proposed Overland Pass Energy East Project (Project) located in Sedgewick County, Colorado. This desktop geohazard assessment has revealed no subsurface conditions that would preclude development of the proposed wind project, although special consideration should be given to further evaluating the collapse potential of the shallow silt on site. The following table summarizes the geologic hazards that were evaluated, the associated risk level, and a recommendation for additional evaluation, if applicable. This executive summary table should be viewed in the context of the entire report for a full understanding of the geohazard risk potential and anticipated subsurface conditions.

Table 1: Executive summary of geohazard assessment findings.

Geohazard	Risk Level	Additional Evaluation Recommendations
Soft/loose/organic soil	Low to Moderate	Evaluate with field and laboratory tests during geotechnical investigation
Collapsible soil	Moderate	Collect relatively undisturbed samples and evaluate with lab testing during geotechnical investigation
Expansive soil	Low	Evaluate plasticity of shallow soil with field and laboratory tests during geotechnical investigation.
Corrosive soil	Low (concrete) Moderate (steel)	Collect soil samples and evaluate with lab testing and electrical resistivity tests during geotechnical investigation
Frost action	Low	Confirm soil profiles and evaluate static groundwater level during geotechnical investigation
Shallow bedrock and obstructions	Moderate	Perform soil borings and rock coring (if required) during geotechnical investigation
Karst features	Low	Evaluate karst features during geotechnical investigation through rock coring and field observations
Mining	Low	None
Seismicity and liquefaction	Low	Design structures to resist seismic shaking, in accordance with applicable Codes.
Landslides and rock falls	Low	Perform observations of existing slope condition and avoid locating infrastructure on or near steep slopes.

Table 2: Executive summary of select geotechnical risks.

Project Element	Geotechnical Risk	Risk Level
Wind Turbine Spread Footing Foundations	Weak or problematic subgrade soil, or shallow groundwater, requiring ground improvement, buoyant foundation, or alternative foundation design.	Low
Deep Foundations	Deep drilled pier embedment depths due to weak soil capacity.	Low
Shallow Foundations	Weak or problematic subgrade soil requiring ground improvement or alternative foundation design.	Low to Moderate
Foundation Corrosion	Sacrificial steel and/or galvanization of steel and/or sulfate-resistant cement for slab-on-grade foundations.	Low to Moderate
Access Roads	Weak or problematic subgrade soil requiring thicker aggregate section, chemical stabilization (e.g., cement), or geosynthetic reinforcement.	Low to Moderate
Underground Cable	High thermal resistivity causing the need for increased cable sizing.	Moderate
Grading/Trenching	Shallow rock/cemented soil may require ripping/blasting and increase grading costs.	Low to Moderate
Fill Placement	Native soil is sensitive to moisture but may require moisture conditioning for adequate compaction.	Moderate
Groundwater	Shallow groundwater in excavations requiring dewatering.	Low
Erodibility	Moderate erosion potential of shallow soils requiring minimal ground disturbance and/or potential for additional ground stabilization and erosion control measures.	Low to Moderate

1.0 Introduction

This report presents the findings of the desktop geohazard assessment conducted by Westwood Professional Services (Westwood) for the proposed Overland Pass Energy East Project. Westwood understands that the Project is located in Sedgewick County, Colorado. The primary focus of this report is to present the findings of the desktop geohazard assessment and discuss the risk level each hazard poses to the project. Recommendations are provided for additional studies or investigations that are beyond the scope of this work but may be performed to further evaluate risk.

This report is intended for the exclusive use of National Renewable Solutions, to support the development of the proposed Overland Pass Energy East Project. Data was gathered from publicly available sources. Subsequent investigations and studies will be necessary to characterize the subsurface conditions and geologic hazards more accurately across the project site.

The proposed project site is located approximately 5 miles south of Sedgewick, Colorado. Refer to Exhibit 1 and 2 for a map of the project site and topography of the surrounding area.

1.1 Regional Geology

The project site is located in the High Plains Section of the Great Plains Province within the Interior Plains Physiographic Region (USGS, 2013). The High Plains section encompasses the majority of Nebraska west of Lincoln, and stretches into eastern Wyoming and Colorado, and south through the Panhandle of Texas. This physiographic section is characterized by relatively flat lying horizontal sedimentary bedrock deposited during periods of shallow inland seas of the continent, and then overlaid by fluvial deposited sedimentary rock of the Ogallala formation during uplift of the Rocky Mountains (Trimble, 1980). Sand dunes and windblown silt/clay deposits (loess) now cover the High Plains of eastern Colorado and buries the underlying Ogallala formation.

According to a geologic map of Colorado, the project is mapped within the Peoria Loess, Ogallala, and Eolian Sands geologic formations (USGS, 1978). Peoria Loess is composed of wind-blown silt with variable clay and sand content. The Peoria Loess forms in vertical cuts or columnar structures and overlies the Ogallala formation where present. The Ogallala has predominantly fine-to coarse-grained poorly sorted fluvial deposits of calcareously cemented silt and sand from the Miocene age (Exhibit 4). Eolian deposits are also mapped within the southwestern corner of the project site and are mainly composed of unconsolidated dune sand and silt (Exhibit 4). Eolian deposits form dunes that may be over 100 ft high (USGS, 1978).

1.2 Soil Profile and Groundwater

Based on Web Soil survey data available through the United States Department of Agriculture (USDA, 2023), there are four primary soil units mapped on site:

- Rago and Kuma Silt loam (approximately 44% of the site): Classified as silt (ML) and lean clay (CL) in the upper 4 feet, composed of silty eolian deposits, with silty gravel and sand (GM, SM) below 4 feet,
- Richfield Loam (~28%): Classified as lean clay (CL), and silt (ML), composed of silty eolian deposits, with higher potential for clayey-silty sand below 2 feet.
- Keith-Kuma Silt Loams (~12%): Classified as lean clay (CL) and silt (ML), composed of silty eolian deposits.
- Wages Gravelly Loam (6%): Classified as silty clay (CL-ML), clayey sand (SC), silty sand (SM), and clayey gravel (GC), composed of gravelly and loamy silty eolian deposits.

Refer to Exhibit 3 for a map of the surficial soils on site. The primary soil units' shallow soils on site have low to moderate erodibility factors (k), ranging from 0.10 to 0.55 (out of 0.7 maximum) (USDA, 2023).

Publicly available water well logs were reviewed for estimations of water table depth. Well logs found within the project site were recorded prior to 1980 and showed groundwater 180 ft below ground surface or deeper (CWCB, 2023). Water well logs also showed a mixture of eolian deposits and occasional gravelly clays in the upper 20 ft.

2.0 Geologic Hazards

2.1 Soft/Loose/Organic Soil

Foundations located in areas of soft/loose/organic soil may have reduced bearing capacity and increased compressibility that can present challenges to the design of shallow and deep foundations. Access roads may also require a thicker gravel cross section and subgrade stabilization/reinforcement. Low density silt also tends to have a high thermal resistivity, which may increase the size of underground electrical cables.

The Web Soil Survey (USDA, 2023) maps most of the site as silt or clay derived eolian sands and loess with low organic content below the topsoil. The overall risk of soft/loose/organic soils on site is considered low to moderate, with greater potential for loose wind blown deposits in the upper 5 feet of the subsurface. Field and laboratory tests performed during the geotechnical investigation should evaluate and confirm the strength and compressibility of the soil on site.

2.2 Collapsible Soil

Soil collapse occurs when a relatively loose, dry, low-density material is inundated with water and subjected to a load. Eolian deposits such as loess are particularly prone to collapse, as their depositional environment facilitates a loose, low-density profile. The risk of collapse occurring beneath shallow foundations is generally considered low if proper subgrade preparation measures are taken. The shallow soil mapped on site is expected to be silt and lean clay alluvium or eolian deposits, which indicates moderate potential for soil collapse. Spread footing turbine foundations are anticipated to bear between 8 and 12 feet below grade, which is typically below the anticipated depth of collapse potential. Collapse potential and consolidation tests may be performed during the geotechnical investigation to better quantify collapse potential, especially in areas with shallow foundations such as the substation.

2.3 Expansive Soil

Expansive or swelling soils have the potential to undergo volume expansion upon wetting or drying. Swell potential depends strongly on physicochemical interactions between particles, and swelling soils predominantly occur in arid and semiarid areas where the soil contains large amounts of lightly weathered clay minerals. Volume increase may cause uplift forces that can create foundation instability and localized tension zones where cracking may occur. Soil shrinkage may also occur with drying of these clays and can cause differential settlement.

The shallow soils on site are primarily mapped as low to moderate plasticity silt and clay, which is expected to have a low potential for expansion. The USDA classifies the soil on site as generally having low to moderate potential for soil expansion based on Web Soil Survey's linear extensibility rating (USDA, 2023). According to a US Army Corp Expansive Soil Map of the United States, the site is mapped within an area of low swelling potential (USACE, 1977). The risk for expansive soils on site is low. Atterberg limits and swell potential tests are recommended during the geotechnical investigation to better quantify expansive soil potential.

2.4 Corrosive Soil

Corrosive soils have the potential to create electrochemical or chemical reactions that may corrode or weaken buried concrete and steel foundations over time. To assess this hazard, soil composition data was analyzed from the USDA Web Soil Survey pertaining to soils considered corrosive to concrete and corrosive to steel. The potential for concrete corrosion was characterized as low across the site with consideration to sulfate and sodium content, texture, moisture content, and acidity (pH) of the soil (USDA, 2023). The potential for corrosion of (uncoated) steel is considered moderate with consideration to soil moisture, particle-size distribution, acidity (pH) and electrical conductivity of the soil (USDA, 2023). Maps of where these corrosion hazard levels occur in relation to the Project site are provided in Exhibits 6 and 7.

Corrosivity tests, including sulfate content, chloride content, pH, and electrical resistivity, should be performed on shallow soil samples collected within the project site during the geotechnical investigation to better characterize the potential for corrosion of buried steel and concrete structures. A detailed corrosion evaluation should also be performed as part of the design phase.

2.5 Frost Action

Frost heave can occur when frozen soil below shallow foundations expands due to the formation of ice lenses. Shallow ground water and silty soils create optimal conditions for the formation of shallow ice lenses that can cause heave (FHWA, 2006). The Naval Facilities Engineering Command Design Manual 7.01 (1986) maps the extreme frost depth at the Project as 4.0 feet. Critical foundations should be placed below the extreme frost depth or designed to accommodate the effects of frost.

The USDA Web Soil Survey (2023) shows the majority of the project site as having low to moderate frost susceptibility. Conventional drilled pier foundations could heave along with the ground surface if not designed to resist frost uplift forces. Access roads may require additional maintenance and gravel placement during the spring thaw. The potential for frost action on site is generally considered low to moderate due to the high fraction of fine-grained soil on site and frost depth, but lack of water source to develop significant ice lenses.

2.6 Shallow Bedrock and Obstructions

Shallow bedrock and subsurface obstructions, such as gravel, cobbles, boulders, and cemented soils are an important consideration when evaluating project constructability because it can inhibit trenching, drilled pier construction, and conventional excavations. Based on review of local geology and soil conditions, gravel and/or calcareously cemented soils may be encountered on portions of the site, especially at depths below 14 ft bgs. The Ogallala formation (Exhibit 3) has the highest potential for gravel and cemented soil. The potential for shallow obstructions is considered moderate.

2.7 Karst Features

Karst features generally develop in areas with wet subsurface conditions and soluble bedrock including carbonate rock (limestone and dolomite) or evaporite rock (e.g., gypsum, anhydrite, and halite minerals) that may dissolve over time to form underground caves and create ground instability. Karst geology can

be particularly hazardous as caves develop slowly while failures are rapid, often causing several feet of subsidence and sinkholes at the surface.

According to the USGS Karst Hazard Potential in the United States (2014), the project area does not lie in an area of karst potential. The nearest potential for carbonate rocks at or near the surface in a dry climate are shown 50 miles south of the project site, as seen in Exhibit 8. As this formation is not mapped within the project area, dissolution karst features are not expected to impact the project infrastructure.

2.8 Mining

According to the Colorado Division of Natural Resources (CODNR, 2023), no active underground mines are mapped within or near the project site. There are no sand and gravel pits located within Sedgewick County. The potential for ground subsidence due to the collapse of an underground mines is considered low at the Project site.

2.9 Seismicity and Liquefaction

The USGS Quaternary Fault and Fold Database shows the closest fault to the project site is the Valmont fault, located approximately 150 miles southeast of the site. The Valmont fault is a late Quaternary fault with a southern dipping direction and slip rate of less than 0.2 mm/yr (USGS, 2023a). The fault does not cross through the project boundary, and the risk of ground rupture from existing faults on site is considered low.

Seismicity can also be a hazard in the form of ground shaking from earthquake events at greater distances from the project site. According to the United States Geological Survey (USGS, 2023b), there have been a total of 3 earthquakes with magnitude of 2.5 or greater on the Richter scale in the last 100 years within 100 miles of the project site (Exhibit 5). The nearest earthquake event occurred 75 miles away April 2007 and was a 3.0 magnitude event. On the Mercalli scale, this event would translate to an intensity of MM III and would be felt indoors by many with slight disturbance (MDNR, 2023). Seismicity is not expected to significantly impact the design, construction, or operation of this project. Structural design of project infrastructure should account for seismic shaking in accordance with applicable codes and standards.

Liquefaction is the loss of soil strength from a rapid change in stress condition (most commonly earthquake seismicity), causing the soil to lose shear strength and behave like a liquid. Soils that are coarse-grained, loose, saturated, and poorly graded are most susceptible to densification under cyclic seismic loading. Due to the fine-grained nature of the soil at the project site, deep groundwater, and low magnitude of historic earthquakes, there is low potential for liquefaction.

2.10 Landslides and Rock Falls

Landslides and rock falls are typically associated with steep slopes composed of loose or erodible soils, weak rock formations, unfavorable loading, and a triggering mechanism such as heavy rainfall or a seismic event. Landslides are rotational or translation slides of a land mass over a well-defined slipping

plane. Debris flows are similar to landslides but are typically differentiated by viscous flow of sliding material.

The Overland Pass Energy East Project site does not contain any significantly sloping terrain. According to the U.S. Landslide Inventory (USGS, 2023c), there are no potential landslides within 50 miles of the project site. Due to the relatively flat topography of the project site and the low magnitude of earthquake events near the Project, the risk of landslides and rock falls is considered low.

Soil erodibility is generally mapped as low to moderate, as discussed in Section 1.2 (USDA, 2023). The loss of natural vegetation on loess slopes can lead to progressive erosion which will increase runoff and create a higher susceptibility to slope failure. However, the relatively flat terrain contained within the project boundary presents a low risk for progressive erosion loss. Project infrastructure should not be located on or near steep slopes, which are not commonly seen within the project boundary.

3.0 Supplemental Geotechnical Investigations

Supplemental geotechnical evaluations should be performed on site to assist with development, design, and construction of the Project. Standard geotechnical investigation methods on wind projects applicable to this project site include, but are not limited to:

- Soil borings with standard penetration test (SPT)
- Rock coring where competent bedrock is encountered
- Groundwater measurements, with piezometers installed where groundwater is encountered or anticipated to be less than 15 ft below grade.
- Laboratory testing on select representative samples, including index properties, collapse potential, corrosivity, consolidation on compressible clays, and thermal resistivity
- Electrical resistivity tests performed for grounding design evaluation at representative wind turbines and the project substation
- Seismic testing for subsurface S-wave velocities to evaluate rotational stiffness

This desktop review has not revealed any anticipated subsurface conditions that require specialized investigation methods outside of the industry standard testing scope for a wind project.

4.0 Limitations

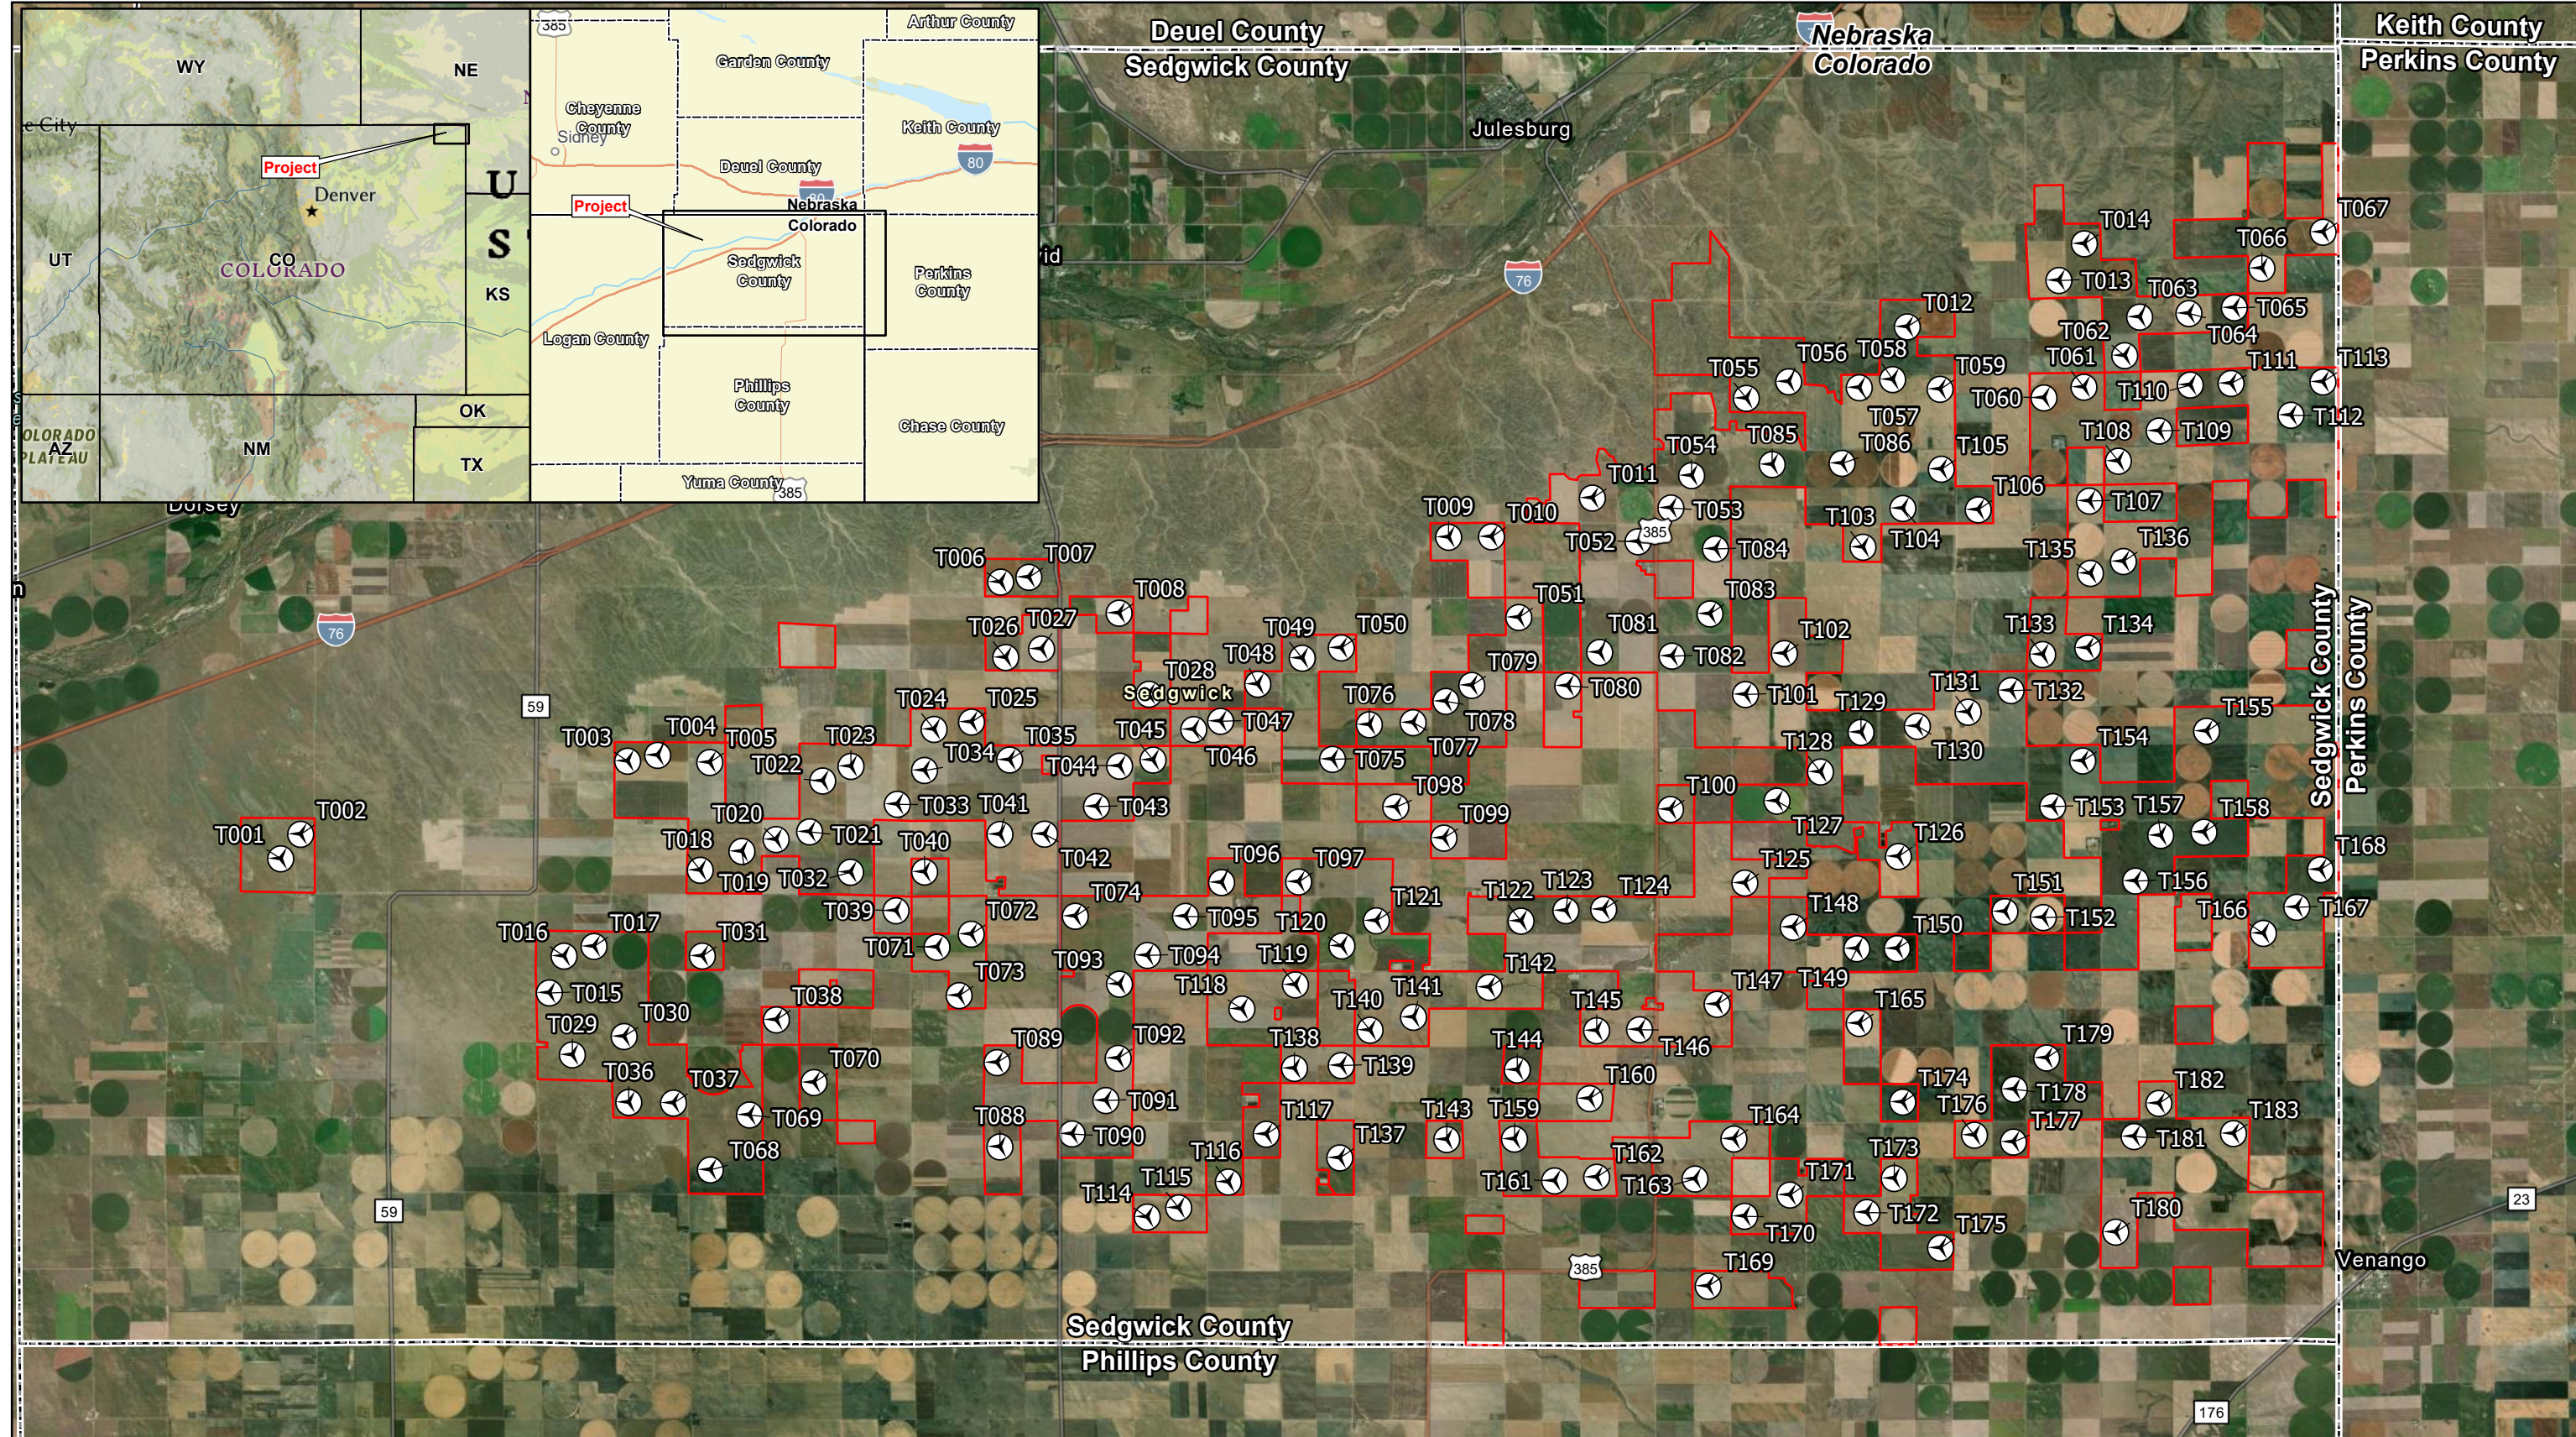

This report has been prepared in accordance with generally accepted geotechnical engineering practice for the exclusive use by National Renewable Solutions for the Overland Pass Energy East Project. The desktop geohazard assessment in this report was based on a review of available resources and is dependent on the accuracy of data compiled by others. Careful consideration and judgment was used to choose reliable sources; however, a subsequent detailed geotechnical investigation will be necessary to validate conditions and more accurately characterize the geologic hazards and subsurface conditions across the site. The primary focus of this report was to identify the potential risk of various geohazards and provide recommendations for additional analyses and investigations.

In the event that any changes in the nature, design, or location of the project site are made, the conclusions and recommendations contained in this desktop report should not be considered valid unless the changes are reviewed and the conclusions of this report are modified or verified in writing by Westwood. Westwood is not responsible for any claims, damages, or liability associated with the interpretation of this data by others.

1. Introduction

Microwave bands that may be affected by the installation of wind turbine facilities operate over a wide frequency range (900 MHz – 23 GHz). Comsearch has developed and maintains comprehensive technical databases containing information on licensed microwave networks throughout the United States. These systems are the telecommunication backbone of the country, providing long-distance and local telephone service, backhaul for cellular and personal communication service, data interconnects for mainframe computers and the Internet, network controls for utilities and railroads, and various video services. This report focuses on the potential impact of wind turbines on licensed, proposed and applied non-federal government microwave systems.

2. Project Overview

Project Information

Name: Overland Pass East Energy

County: Sedgwick

State: Colorado

Number of Turbines: TBD

Blade Diameter: TBD

Hub Height: TBD

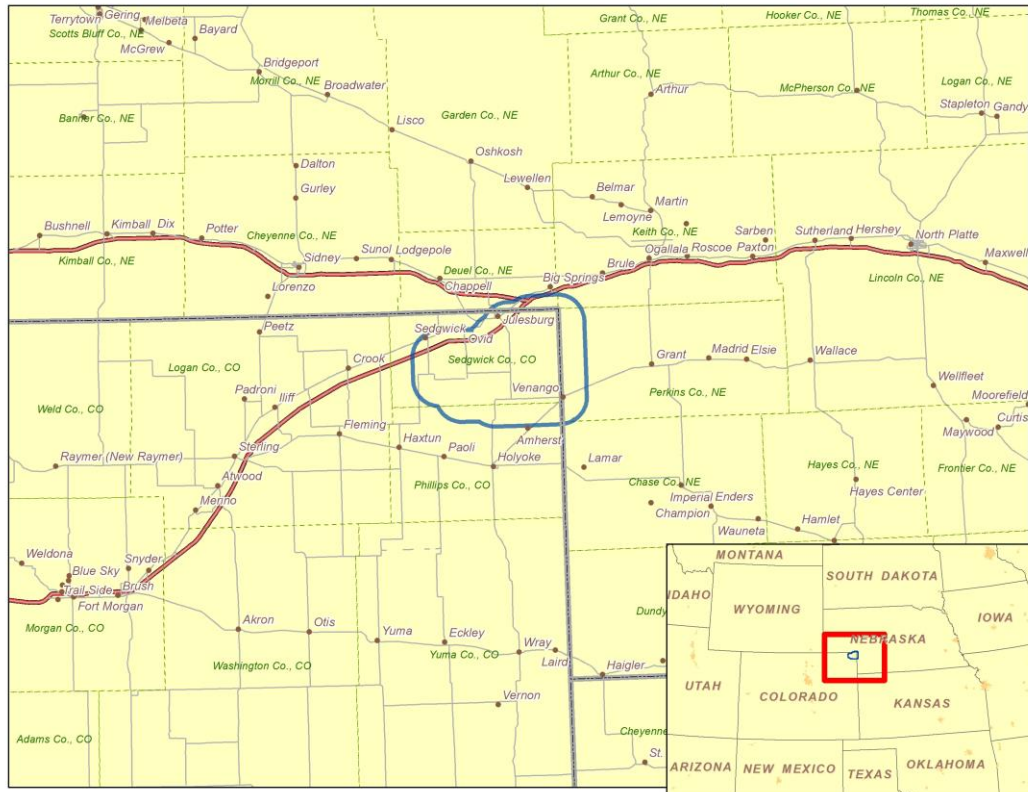

Figure 1: Area of Interest

3. Fresnel Zone Analysis

Methodology

Our obstruction analysis was performed using Comsearch’s proprietary microwave database, which contains all non-government licensed, proposed and applied paths from 0.9 - 23 GHz¹. First, we determined all microwave paths that intersect the area of interest² and listed them in Table 1. These paths and the area of interest that encompasses the planned turbine locations are shown in Figure 2.

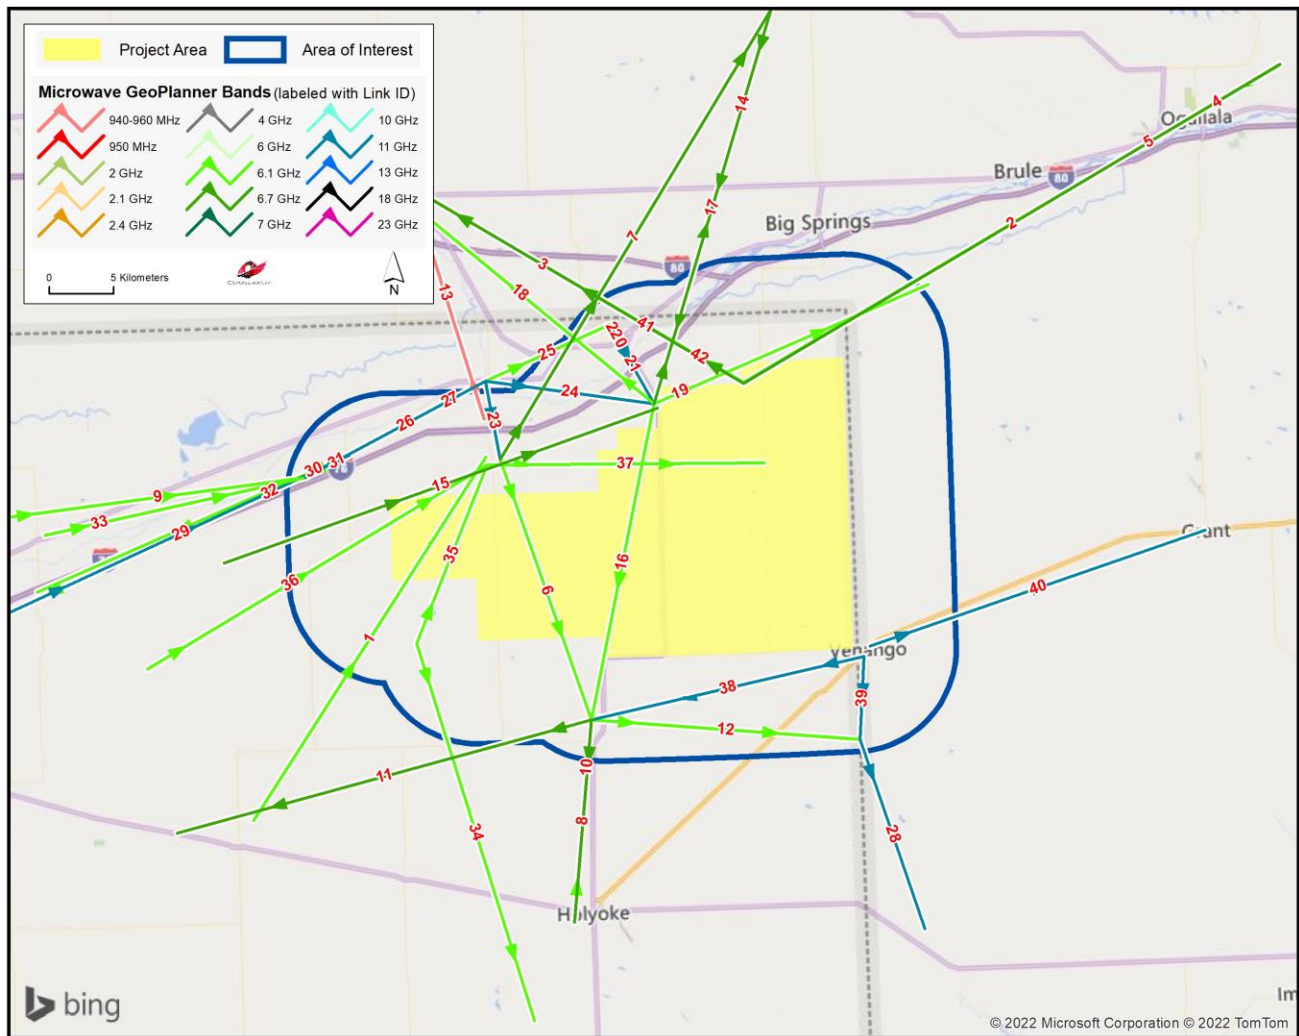

Figure 2: Microwave Paths that Intersect the Area of Interest

¹ Please note that this analysis does not include unlicensed microwave paths or federal government paths that are not registered with the FCC.

² We use FCC-licensed coordinates to determine which paths intersect the area of interest. It is possible that as-built coordinates may differ slightly from those on the FCC license.

----	----------	---------	---------	-------------	-------	--------------------------------

Table 1: Summary of Microwave Paths that Intersect the Area of Interest

*(See enclosed mw_geopl.xlsx for more information and
GP_dict_matrix_description.xls for detailed field descriptions)*

Next, we calculated a Fresnel Zone for each path based on the following formula:

Where,

- r = Fresnel Zone radius at a specific point in the microwave path, meters
- n = Fresnel Zone number, 1
- F_{GHz} = Frequency of microwave system, GHz
- d₁ = Distance from antenna 1 to a specific point in the microwave path, kilometers
- d₂ = Distance from antenna 2 to a specific point in the microwave path, kilometers

The calculated Fresnel Zone shows the narrow area of signal swath and is calculated for each microwave path in the project area. In general, this is the area where the planned wind turbines should be avoided, if possible. Likewise, Comsearch recommends that an area directly in front of each microwave antenna should be avoided. This corresponds to the Consultation Zone which measures 1 kilometer along the main beam of the antenna and 24 ft (7.3 meters) wide. A depiction of the individual Fresnel and Consultation Zones is shown in Figure 3, and is also included in the shapefiles^{3,4}.

³ The ESRI® shapefiles enclosed are in NAD 83 UTM Zone 13 projected coordinate system.

⁴ Comsearch makes no warranty as to the accuracy of the data included in this report beyond the date of the report. The data provided in this report is governed by Comsearch's data license notification and agreement located at http://www.comsearch.com/files/data_license.pdf.

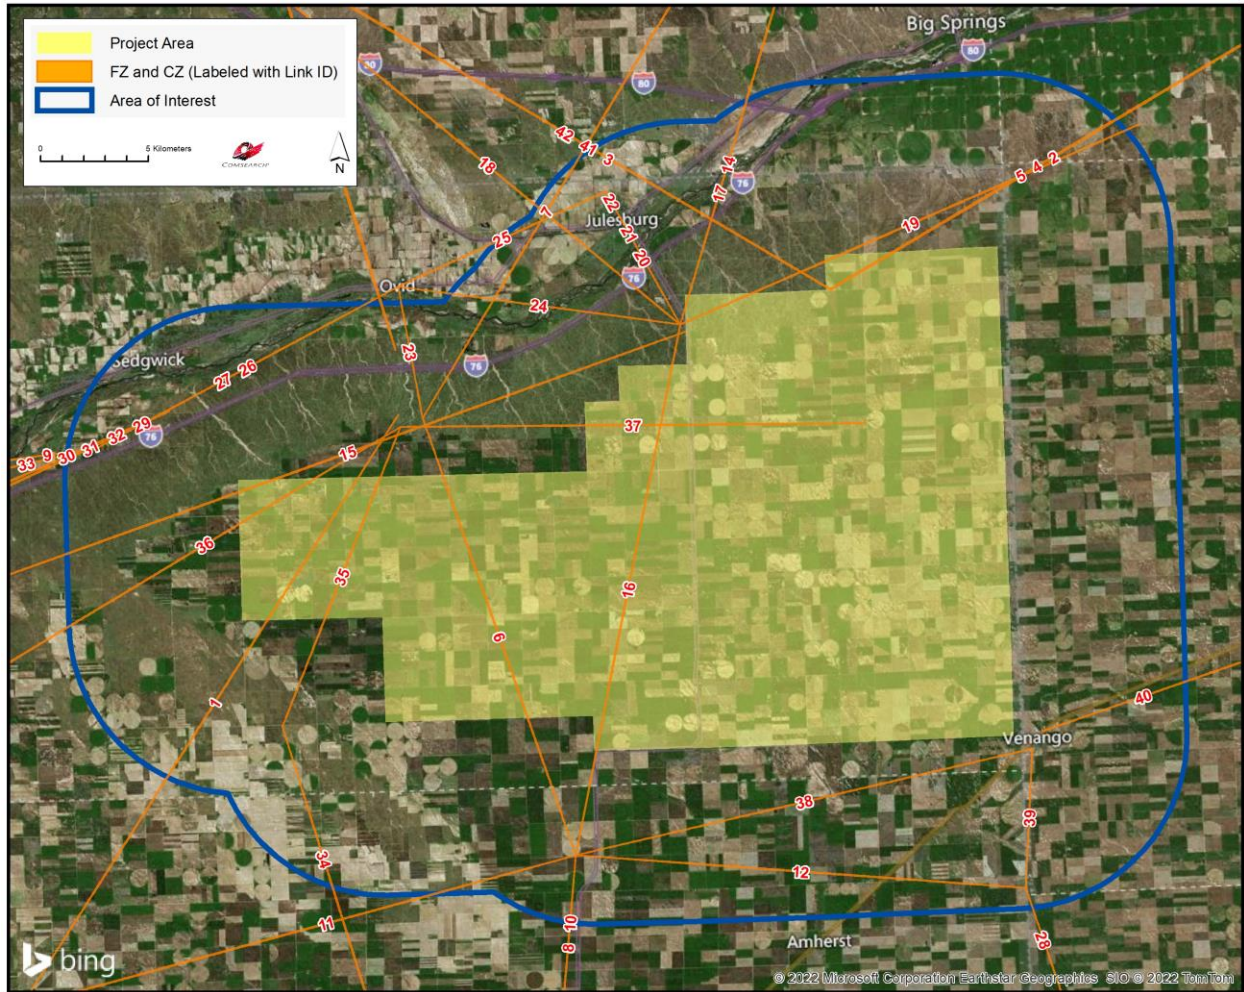

Figure 3: Fresnel and Consultation Zones in the Area of Interest

Discussion of Potential Obstructions

Total Microwave Paths	Paths with Affected Fresnel Zones	Total Turbines	Turbines intersecting Fresnel Zones
42	N/A	N/A	N/A

For this project, turbine locations were not provided; thus we could not determine if any potential obstructions exist between the planned wind turbines and the incumbent microwave paths. If the latitude and longitude values for turbine locations are provided, Comsearch can identify where a potential conflict might exist.

4. Conclusion

Our study identified 42 microwave paths intersecting the Overland Pass East Energy project area. The Fresnel and Consultation Zones for these microwave paths were calculated and mapped. We recommend that all turbines be sited in locations that will not encroach on these exclusion zones.

Attachment 2.14
Preliminary Decommissioning Plan

Draft Decommissioning Plan

This draft Decommissioning Plan for the Overland Pass East wind project (the “Project”) accompanies an application for Sedgwick County Special Use Permit filed by Overland Pass Energy, LLC, a National Renewable Solutions company (the “Applicant”). This Plan has been drafted in accordance with the rules and requirements outlined in the Sedgwick County Comprehensive Plan and Zoning Ordinance Wind and Solar Amendment for Utility Scale Wind Systems (13-105 A.1.k). As described in the February, 2023, Special Use Permit Application, the Project footprint allows for a nameplate capacity of up to 750 MW, using approximately 167 individual 4.5 MW wind turbine locations. The Applicant commits to decommission its project and, to the extent feasible, restore the site to its original condition within a reasonable period of time following the end of the useful life of the Project.

1. Anticipated life of the Project

The Project represents an operational period of at least 30 years in its leasing agreements and anticipates the installed equipment and infrastructure to have a lifespan of at least 30 years. Given advancements in generator technology and typical operation wear and tear, the Project could be renewed/repowered at some point following initial installation, leading to extensions in Project’s useful life beyond 30 years. During the 30 years of operation and any possible extensions, the Applicant commits to maintaining the wind facility in a working, safe, and quality condition.

Decommissioning shall commence following the end of the Project’s useful life, including any extensions, by notice to Sedgwick County from the Applicant, or following a period of eighteen (18) months of continuous non-operation of the facility. Exception shall be given if non-operation is caused by force majeure as defined below:

Force majeure refers to any fire, earthquake, flood, or other casualty, condemnation or accident; strikes or labor disputes; war, acts of terrorism, civil strife or other violence; any law, order, proclamation, regulation, ordinance, action, demand or requirement of any government agency or utility; epidemic/pandemic; or any other act or condition beyond the reasonable control of the Applicant, so long as the Applicant has not caused the event of force majeure through its own act or negligence.

2. Decommissioning Process

Following Special Use Permit approval and before Project construction commences, the Applicant will draft and submit to the Sedgwick County Board of County Commissioners a Final Decommissioning Plan, however the decommissioning process shall adhere to the following guidelines:

- (a) The Applicant shall decommission the Project in compliance with any agreement with the Sedgwick County Board of County Commissioners and any relevant federal, state, and/or local regulations, laws, ordinances, and orders unless given special provisions by any of the previously mentioned entities.
- (b) Decommissioning shall include the removal of all above-ground wind facilities including but not limited to: wind turbine towers, meteorological towers, overhead power lines, substations, and any operations or maintenance buildings. Exceptions shall be allowed in the event private landowners at the time prefer to keep non-electrical infrastructure (such as O&M buildings, fencing, or access roads) for future alternate use. Decommissioning shall also include removal of all below-ground structures to a depth of at least twenty-four (24) inches including but not limited to: drainage structures, collection systems, fiber optic cables, and communication lines.
- (c) If requested by current surface owner of the property on which decommissioning is taking place, the applicant shall remove any installed roads.
- (d) The decommissioning process shall not cause interference to the use of any surrounding property not under a lease agreement the Applicant.
- (e) These terms, and the terms of and future Decommissioning Plan, shall be binding upon the Applicant and shall run with the sale of the facility to any of their successors, assignees, or heirs.

The County has the right to review and request modifications to the Final Decommissioning Plan up to the start of Project construction. However, the County shall make an effort to finalize any review so as to not unreasonably delay the start of construction. The County also has the right to review final decommissioning efforts to confirm they are consistent with said Final Decommissioning Plan. Following reasonable notice, the County shall have the right to enter the wind facility property to complete decommissioning efforts if they determine such efforts are not in compliance with the Decommissioning Plan or any agreements between the owner of the wind facility and the current surface owner of the wind facility property.

3. Site Restoration

Following the removal of the wind facilities, the Applicant will use commercially reasonable efforts to restore any disturbed soil and vegetation to a pre-construction condition. Complete details of restoration shall be provided with the Final Decommissioning Plan but shall include the general guidelines:

- (a) Restoration efforts shall use photos taken prior to construction for reference in restoring soil and vegetation.
- (b) Any holes or ditches created by the removal facilities shall be back-filled. Disturbed soil shall be re-seeded to promote the growth of an appropriate vegetation to the site area.
- (c) Topsoil shall be preserved from the areas being worked and stockpiled near origination for later use in site restoration.
- (d) Burrowing wildlife will be monitored during restoration efforts for impacts to operations.

4. Decommissioning Costs

The Applicant proposes to calculate and provide an estimate of the decommissioning costs, certified by a Professional Engineer, at the time the Final Decommissioning Plan is submitted, prior to the start of construction, and once the full engineering details of the final construction plan are known. This cost estimate will run with the Project and may be re-evaluated and updated (no more frequently than every five years) upon request by the County. Following Special Use Permit approval and prior to issuance of a construction permit and/or building permit(s) for the Project, Applicant shall provide financial security to the County for the estimated decommissioning costs in such form as agreed upon between the Applicant and the Sedgwick County Board of Commissioners. Such security shall also be accompanied by a mutually-approved Security Agreement, detailing what conditions under which the security could be called upon or released. Applicant proposes, for County review and approval, the following escalating schedule for posted security:

- 1) Prior to Issuance of Building Permit: Applicant posts Security covering 25% of estimated Decommissioning Costs,
- 2) At 5-year Anniversary of Commercial Operations Date: Applicant posts additional Security an additional 25% of estimated Decommissioning Costs (50% total),
- 3) At 10-year Anniversary of Commercial Operations Date: Applicant posts additional Security an additional 25% of estimated Decommissioning Costs (75% total),
- 4) At 15-year Anniversary of Commercial Operations Date: Applicant posts additional Security an additional 25% of estimated Decommissioning Costs (100% total),
- 5) Applicant continues to maintain 100% Security through Project decommissioning.
